DYNAMIC IP

HOLLYLAND
*For a better view!*

NOTE: Please long press the middle button of the base station then select Network icon to do the network setting

1 The default Wi-Fi settings is OFF, SSID and password will be displayed after you select ON, then you can connect Wi-Fi via phone to connect our APP.
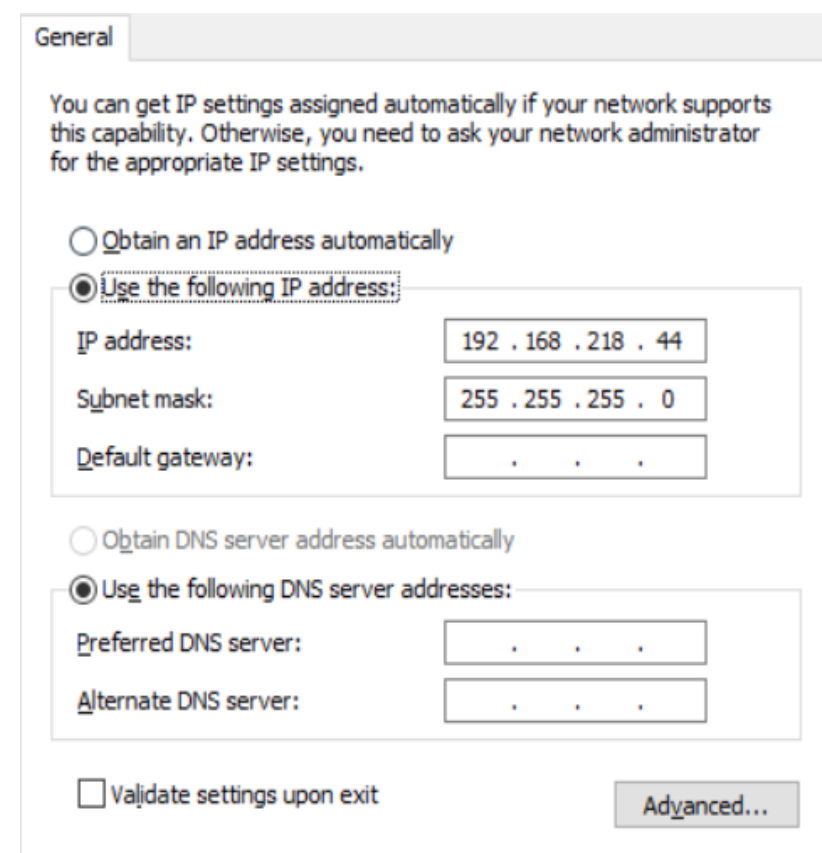

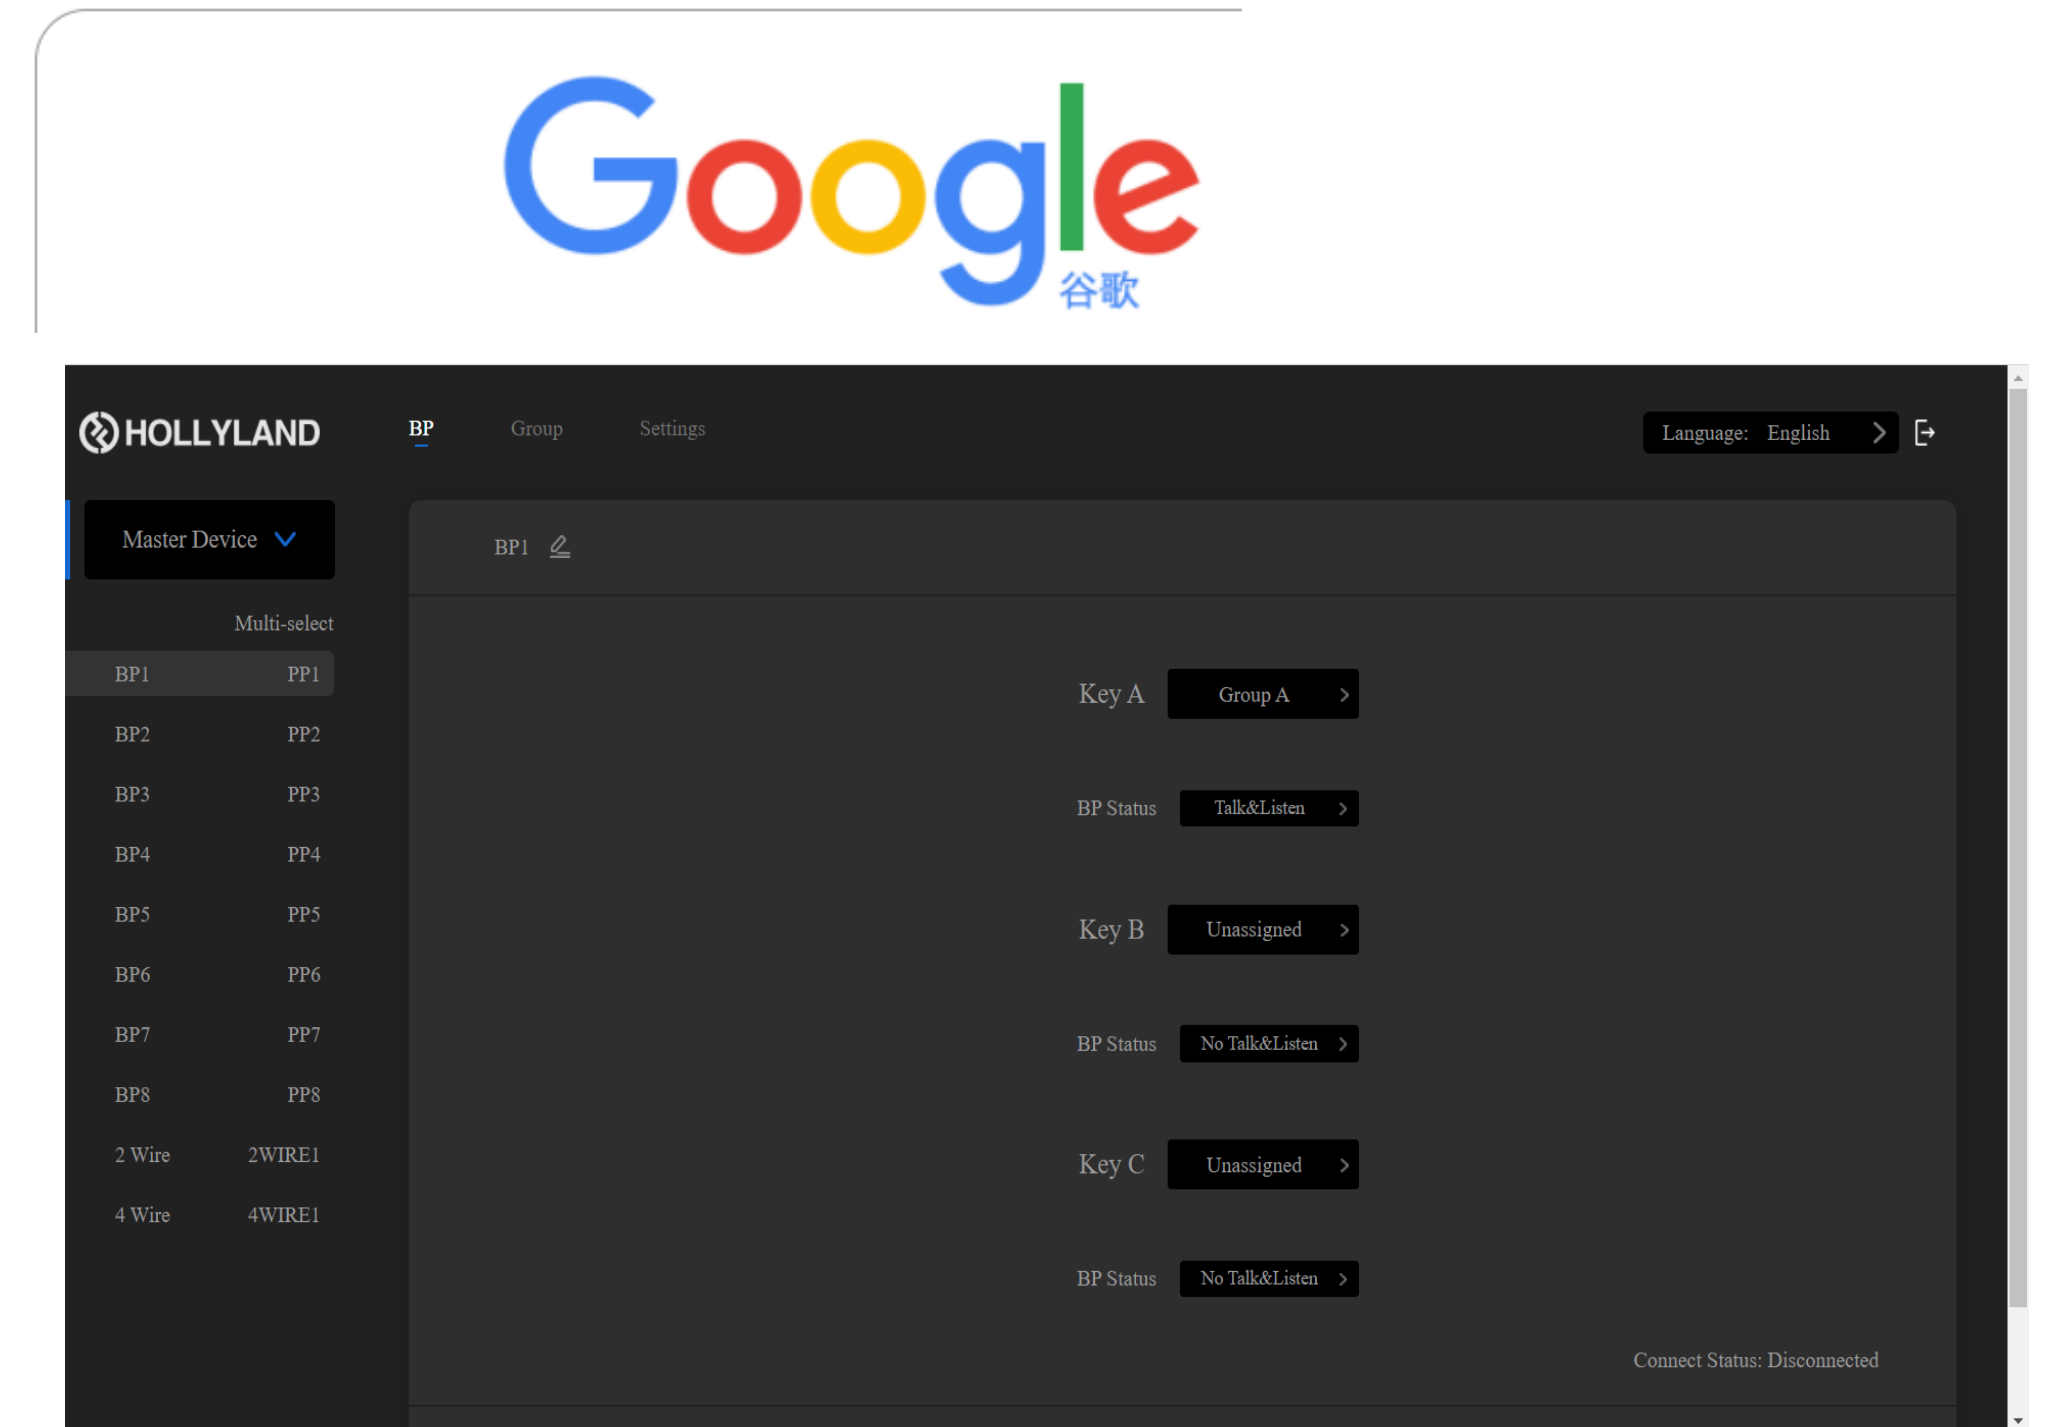

2 The function of DHCP is OFF by default, all IP information are fixed. The IP address will be assigned by the router after you select ON and you can not check the information on the base station
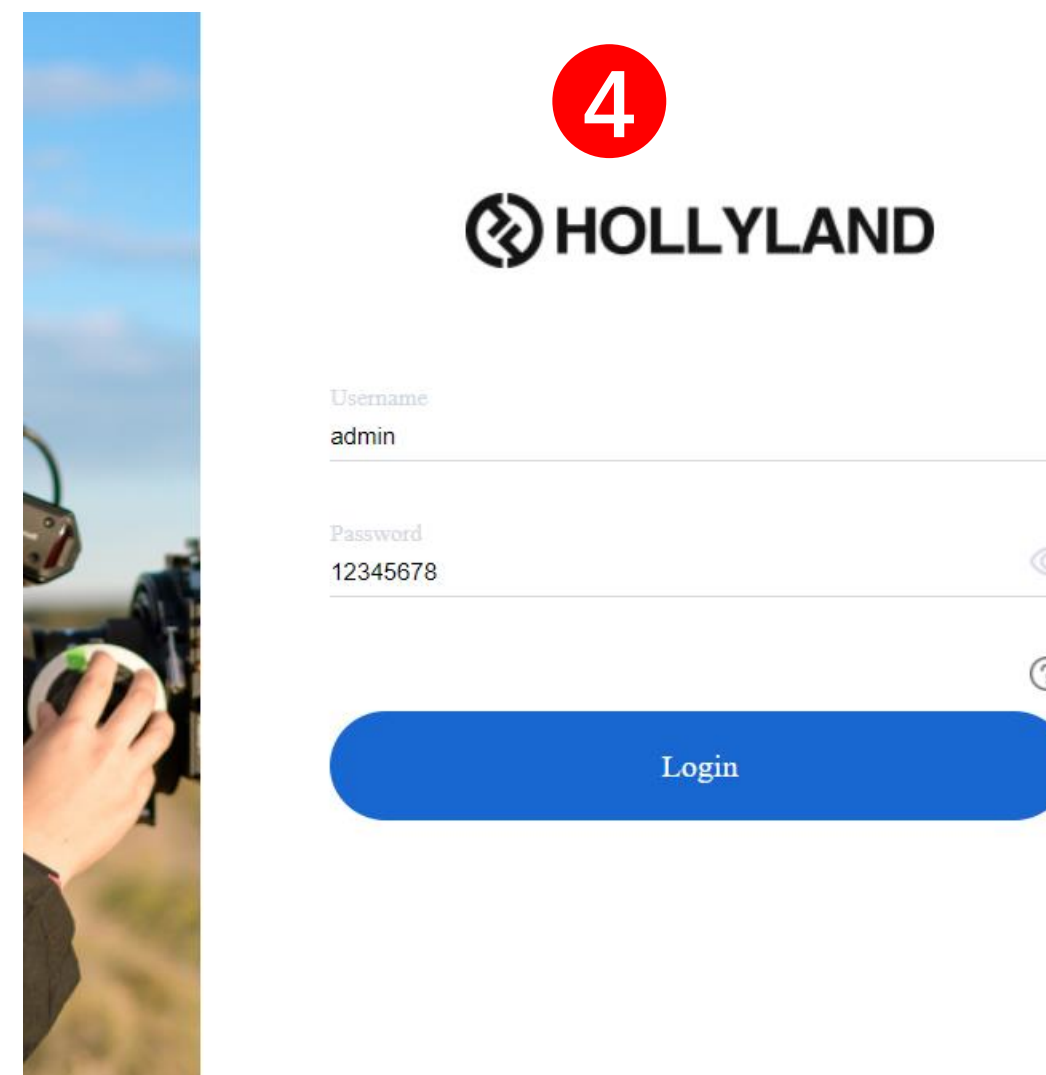

Network

1

Standard network cable

3 Enter the device's IP address on Google Chrome

← → C   192.168.218.10

Google 谷歌

2

General

You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.

○ Obtain an IP address automatically
● Use the following IP address:

IP address: 192 . 168 . 218 . 44
Subnet mask: 255 . 255 . 255 . 0
Default gateway: .   .   .

○ Obtain DNS server address automatically
● Use the following DNS server addresses:
Preferred DNS server: .   .   .
Alternate DNS server: .   .   .

☐ Validate settings upon exit   Advanced...

Set IP address manually to 192.168.218.XX

The IP address can not be the same as the device
