

⚠ WARNING

Before operating this equipment, please read this manual carefully and retain this for future reference.

This equipment may cause a person injury, if not installed and used in accordance with this manual.

Attention to users

- ⚠ **Warning** Please follow this instruction for your safety reason.
- Choose the mode appropriate for your lens or camera. Refer to the instruction manual for your lens or camera to determine the correct plug-in. An inappropriate connection may cause a product failure.
- Be sure to tighten the clamp. If the clamp is loose, the product may slide or come off. This may cause a product failure.
- Do not pull the cable. Pulling the cable to disconnect the ZC-9EX or camera may damage the equipment.
- Do not use excessive force when handling the ZC-9EX. Rough handling of the zoom lever, buttons and switches may cause the ZC-9EX to malfunction.
- Use the right connector. The wrong connection or plug-in may damage the ZC-9EX or other connected devices.
- Avoid contacting with water. The ZC-9EX is not water resistant. Do not use it when there is a chance that it may get wet.
- Avoid strong vibrations or high impact.
- Do not use organic solvents (such as paint thinner) on the ZC-9EX.
- The ZC-9EX should be used only for its intended purposes.
- Do not dismantle or modify the ZC-9EX. Dismantling or modification may cause a person injury or a product failure. If there are problems, stop using the device and contact the store or LIBEC customer service.

Caution for users

1. Use the lens switch to choose the appropriate mode.
2. For Sony PMW-EX1 camera, use the EX connector.
3. For Fujinon or Canon lenses (other than the ones for Sony PMW-EX1 camera), for which the connector has a 8-pin terminal, remove the EX cable. For Fujinon and other lenses which have a 12-pin terminal, use the A-12P* (optional) adaptor.
4. The lock mechanism for the connector is off in order to avoid accidents due to negligence.
5. Do not leave the ZC-9EX in a high temperature environment. Keep it away from direct sunlight or any thermal appliance.
6. Keep the connection plug clean at all times.
7. Remove the unit after usage.

Set the corresponding mode

- Switch to the mode appropriate for the lens you are using. Slide the switch as shown in the following diagram to choose the appropriate mode.

- ⚠ **Warning** Inappropriate mode selection can cause a malfunction.

 To use a Fujinon lens or Sony PMW-EX1 camera, slide the switch to F.

 To Use a Canon lens, slide the switch to C.

To choose REC or RET

- Slide the switch to choose either REC (Record mode) or RET (Return mode) depending on the situation.

 To use REC (Record) mode.

 To use RET (Return) mode. Not available to use for the ZC-9EX. (It doesn't correspond to Sony PMW-EX1.)

Attach to the pan handle

The clamp range is between 10mm and 30mm. Do not use any pan handle smaller or larger than this diameter range.

1. Loosen the clamp knob till enough space is available attach to the pan handle.
2. Center of pipe is to be fit to clamp "V" shape. Firmly tighten the clamp by using hands. Connect the cable.

Connect the cable

- Double check to ensure the correct mode is selected.
 - ① Refer to the instruction manual for your lens or camera.
 - ② Locate the plug-in on your lens or camera to connect the ZC-9EX.
 - ③ Make sure your camera is turned off.
 - ④ Plug in the connector correctly.

⚠ **CAUTION** You must plug in the connector at the correct angle. Follow the plug-in guide. Forcing it in may damage the ZC-9EX.

- If you are using a Sony PMW-EX1 camera. Make sure you use the EX connector. The EX connector is connected to the ZC-9EX at the factory.

Operation

- **REC/RET Button**
This changes the mode of "start" and "stop" alternatively. The ZC-9EX will operate in either the REC or RET mode.
- **Using the zoom**
To zoom in/out, turn the zoom lever. You can change the zoom speed by changing the zoom lever angle. In some cases, the zoom speed will not change.
- **To zoom in (telephoto)**
"T" Indication : Turn toward "T" to zoom out to telephoto.
- **To zoom out (wide-angle)**
"W" Indication : Turn toward "W" to zoom out to wide-angle.

To store the ZC-9EX

- Disconnect the ZC-9EX and store securely. Make sure the connector is protected.

- The EX connector will not be provided as a service part. If your EX connector is damaged, please contact repair services.

Description of the ZC-9EX

Mount ZC-9EX on the pan lever

Specifications

- Clamp distance : ϕ 10mm (0.39inch) - ϕ 30mm (1.18inch)
- Main connector cable : 8Pin
Cable length : 750mm (29.5inch)
- EX connector cable : Conversion from 8Pin to 8Pin Micro plug
Cable length : 95mm (3.7inch)

Connect the cable

- To connect to a Sony PMW-EX1 camera. Use the ZC-9EX cable with the EX connector. Adjust the connector angle to align with the guides.

- To connect to a lens (8pin)

Use the ZC-9EX
