CARRY CASE

Note: Instructions are shown using Octa model.

Setup is the same for all Rapid Box units.

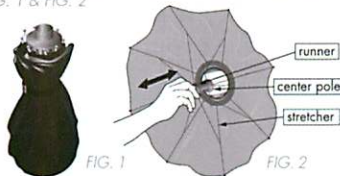

Step 1.

Remove contents from the box.

Step 2.

Hold The Rapid Box in one hand using the rear silver speedring. Undo the Velcro strap around the The Rapid Box and fully open the unit. With the opposite hand, press down on the runner towards the center pole and slide into place. Rotate slightly to lock into place.

SEE FIG. 1 & FIG. 2

HINT: The grooves inside of the runner should connect with two projecting parts in the center pole base. When the runner and center pole base grooves are connected, all the ribs of the box should be straight. SEE FIG. 3, FIG. 4 AND FIG. 5. If they don't connect perfectly, rotate the runner slightly until you feel it lock in place. (If this does not happen, the stretchers will twist and cause stress on the hinges that could cause damage).
